PRO POWERED TOOLS

2023

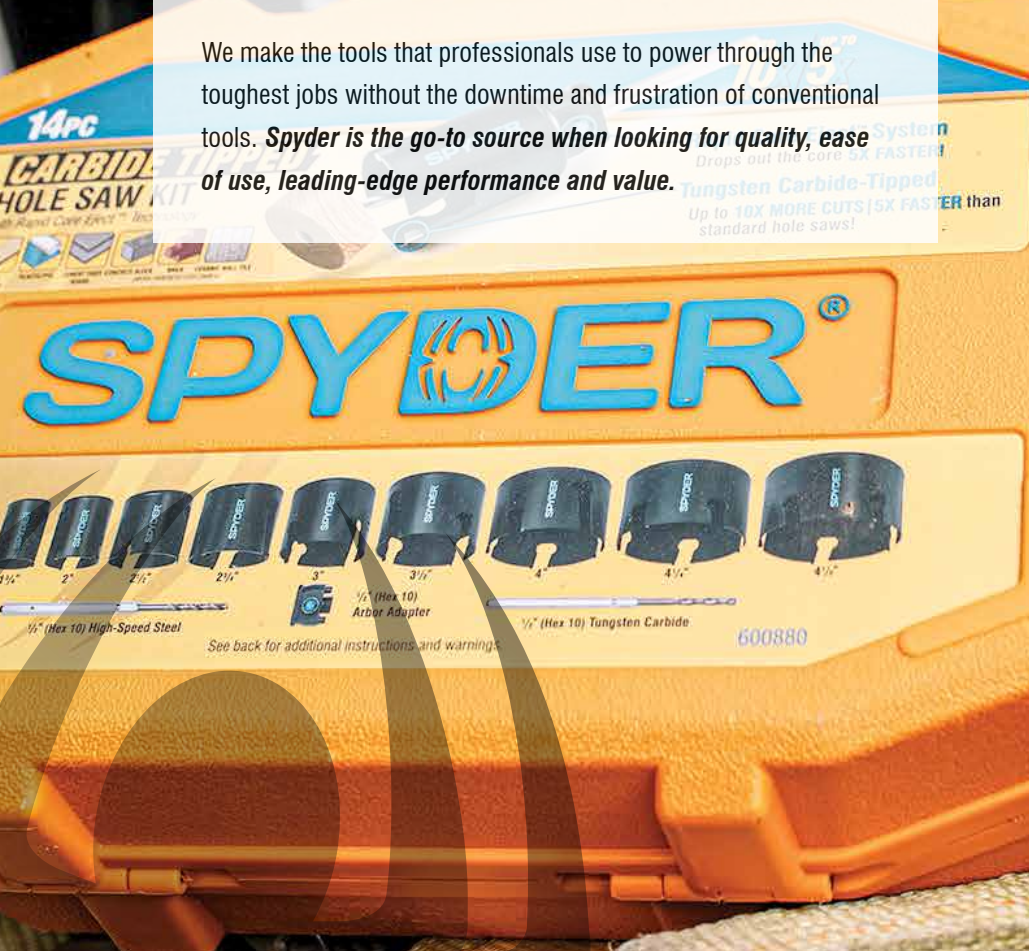

MERCHANDISING CATALOG

PROFESSIONAL TOOLS, WORLD-CLASS INNOVATION

Cutting, drilling, scraping and sawing are hard work, but they don't have to be. There's a smarter way to tackle these time-consuming, labor-intensive, sweat-inducing jobs. **Spyder's innovative power tool attachments are engineered to work harder, complete the job faster and last longer – up to 40x faster and 100x longer tool life!** Using quality materials and innovative designs, our power tool accessories stand up to the punishment that is dished out every day – working as long and hard as the pros who depend on them.

Since our inception in 2008, when the Spyder Scraper® won **New Product of the Year at the National Hardware Show**, we continue to win awards for our innovation and quality. From the versatility of a 3-way cut reciprocating saw blade to effortless hole boring to the ingenious design of an arbor system that removes hole saw cores with a push of a button, every tool is meticulously engineered and constructed to provide significant advantages over the standard way of doing things. **The result is an entire line of high-quality, high-performance tools that save time, effort and money.**

We make the tools that professionals use to power through the toughest jobs without the downtime and frustration of conventional tools. **Spyder is the go-to source when looking for quality, ease of use, leading-edge performance and value.**

STINGER™ SPADE BITS

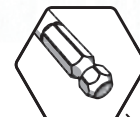

Won't Clog, Won't Wander and Drills Faster than the competition

- Up to **20x faster** than conventional spade bits.
- Up to **10x more** holes than conventional spade bits,
- Automatically engages the work surface for no-thrust drilling.
- Features innovative non-clogging, automatic-feeding precision tip for optimal speed and accuracy.
- Unlike other spade bits with a self-feeding thread point, this patent pending tip won't clog, won't wander, and drills faster than the competition.
- Impact rated for use in battery-powered impacting tools.
- 1/4" speed hex won't slip in the chuck and fits quick-change impact drivers.

Patent Pending
Tip Won't Clog,
Won't Wander.

STINGER™ POWER BITS™

Bores Faster with Less Torque; Excellent for Fast, Clean, Precise Applications

- Up to **40x faster** than conventional spade bits.
- Up to **25x more** holes per charge than conventional spade bits.
- Up to **50% less** drilling torque than other threaded wood boring bits.
- Create extremely clean entry and exit holes.
- Use on high or low torque drills - drill more holes, save battery power.
- Impact ready with 1/4" speed hex.
- Ideal for use on soft and hard woods, laminated wood and particle boards.

MACH-BLUE™ RECIPROCATING SAW BLADES

Mach-Blue™ Plating & 8% Cobalt Bi-Metal Construction for Increased Durability in Tough Applications

- Up to **20x longer lasting** than conventional bi-metal blades.
- Super hard proprietary Mach-Blue™ plating retains sharper cutting edges for fast and accurate cutting.
- Shatter-resistant bi-metal blade is designed to bend and flex for added safety.
- Variable tooth pitch guarantees fast and clean cuts through a wide variety of materials.
- Extreme value when compared to more expensive carbide tipped reciprocating saw blades.
- Cuts wood with nails, steel, PVC and more.
- Made in Germany.

JIG SAW BLADES

Fast and Clean Cuts through Wood

- Skeleton™ open framework design creates exceptionally straight cuts and blades dissipate frictional heat for extreme durability.
- Double-Sided blades cut forward, backward, and pivot like a scroll saw to make tight curve cuts.
- Blade types include: Fast Straight, Clean Straight, Clean Straight Down, Fast Curve and Clean Curve.
- Blade lengths include: 3-1/2", 4" and 4-1/2".
- Made in Germany.

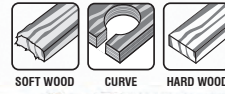

SKELETON™

Skeleton™ Open Framework Design Creates Exceptionally Straight Cuts.

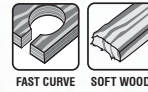

Down Cut Creates Cleaner Top Cuts.

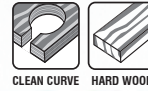

DOUBLE-SIDED™

Double-Sided Blades Create Precise, Small Curve Cuts.

Aggressive teeth for fast curves

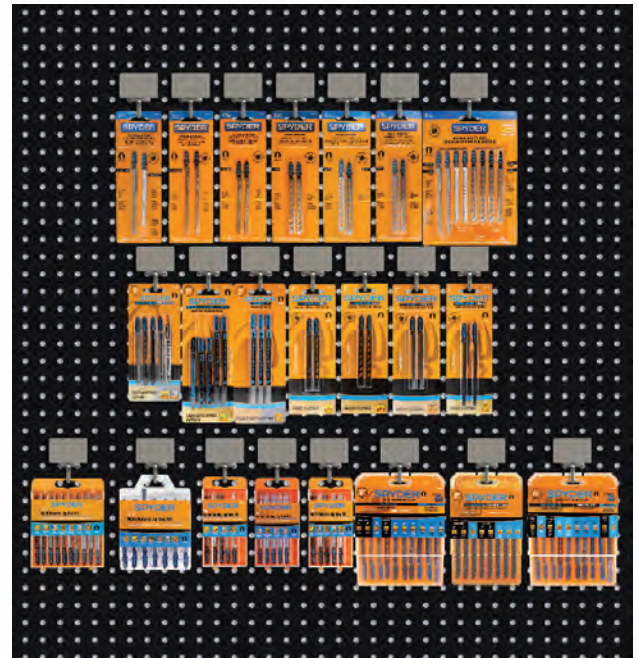

Neutral grind for clean curves

SPYDER® RECIPROCATING ACCESSORIES

CARBON STEEL WIRE RECIPROCATING BRUSH

Fits Where Many Rotary Brushes Cannot

- Use on metals, concrete, stone and wood surfaces.
- Tough carbon steel bristles remove the toughest contaminants.
- Removes flaking paint, rust, scratches, dirt and small imperfections.
- Fits all reciprocating saws.

SPYDER® SCRAPER™ RECIPROCATING BLADES

Finish the Job in a Fraction of the Time with a Fraction of the Effort

- Easily remove tile, linoleum flooring, mastics and more.
- Quenched and tempered high-carbon spring steel retains edge sharpness.
- Re-sharpenable blade extends tool life.
- Multiple applications.
- Fits all reciprocating saws.
- Made in the USA.

GROUT-OUT™ RECIPROCATING BLADES

Provides Both Speed and Precision to Make Your Job Easy

- Up to 10x faster than hand removal.
- Vacuum-braided tungsten carbide grit quickly removes grout.
- Power through any grout in a fraction of the time – including urethane and epoxy.
- Fits all reciprocating saws.

SANDER

Tight Spaces, Curved Surfaces and Hard-to-Reach Corners

- Quickly sand tight spaces, curved surfaces and outside and inside corners.
- Tough insert-molded attachment blade provides maximum durability.
- Hook-and-loop sandpaper is quick and easy to replace.
- 3 piece sandpaper set included.
- Compatible with Mouse™ sandpaper.
- Fits all reciprocating saws.

NYLON RECIPROCATING BRUSH

Makes Clean-Up and Surface Prep a Snap

- Use on grout, carpet, tile, laminates, rubber, concrete, brick and more.
- Nylon bristles provide tough cleaning power without scratching surfaces.
- Makes quick work of stubborn layers of grime.
- Fits all reciprocating saws.

SPYDER® OSCILLATING TOOL BLADES

- Make up to **60x more cuts** than standard Bi-Metal blades for increased service life in demanding plunge and lateral cuts in wood, nails, screws, PVC, drywall and more.
- A universal fit arbor ensures compatibility with all open-back oscillating tool motors.
- A full 2" depth of cut on each blade ensures maximum reach and superior cutting tooth velocity.
- Bi-Metal blades feature an 8% cobalt bi-metal cutting edge that resists high cutting heat and these blades are dual/ tri-plated for additional friction reduction and edge retention.
- High speed steel blades feature a Japanese-tooth cutting geometry that makes the cleanest cuts in soft and hard woods.
- These blades are not compatible with Starlock™ tools.

LINEAR EDGE

**TUNGSTEN CARBIDE TIPPED (TCT)
RAPID CORE EJECT™ HOLE SAWS**

CARBIDE TIPPED

Extreme Material Versatility and Faster Cuts

- Up to **10x more cuts** than bi-metal hole saws.
- Up to **5x faster than** standard hole saws.
- Tungsten Carbide Tipped for extended life and clean cuts.
- Cuts wood, concrete block, brick, fiber cement board, PVC and more, with a Mohs hardness of less than 6†.
- Up to 2-3/8" Depth of Cut.
- Utilizes Rapid Core Eject™ Arbor System – rapidly eject the core, quickly change diameter, cut at an angle and enlarge existing holes.
- For use in standard rotary drills, **not for use in hammer drill mode.**

HOLE SAWS

HOLE SAW KITS

Carbide Tipped (TCT), Bi-Metal, and Tarantula Kits

- Speed through tough jobs with Spyder's patented Rapid Core Eject™ Arbor System.
- Completes the job 5x faster than the competition and makes your time more valuable.
- Rugged, hard plastic carry case keeps your tools organized.

Rugged, Hard Plastic Carry Case

Select kits only

Kits, in a carry case, available in multiple configurations:

- TCT Kits include 6, 14 or 18 pieces
- Tarantula Kit includes 9 pieces
- Bi-Metal Kits include 11 or 13 pieces
- Pro Pack includes 14 piece TCT Kit and 13 piece Bi-Metal Kit

All of our hole saw kits utilize our Spyder® Patented Rapid Core Eject™ Arbor System

Remove the Core with a Push of the Button!

TUNGSTEN CARBIDE TIPPED (TCT) DEEP CUT HOLE SAWS

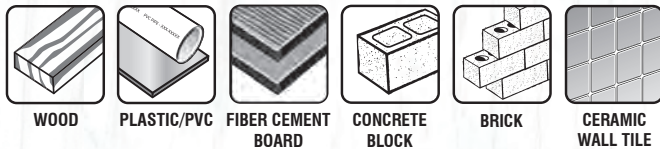

Extreme Material Versatility and Faster Cuts

- Up to **10x more cuts** than bi-metal hole saws.
- Tungsten Carbide Tipped for extended life and clean cuts.
- Cuts wood, concrete block, brick, fiber cement board, PVC and more, with a Mohs hardness of less than 6†.
- Up to 6-1/4" Depth of Cut.
- Deep Cut Hole Saws use Hex11 deep cut arbor and pilot bit. Not compatible with the Rapid Core Eject™ Arbor System.
- For use in standard rotary drills, **not for use in hammer drill mode.**

UP TO
10x
MORE

Tungsten Carbide Tipped for Extended Life and Clean Cuts.

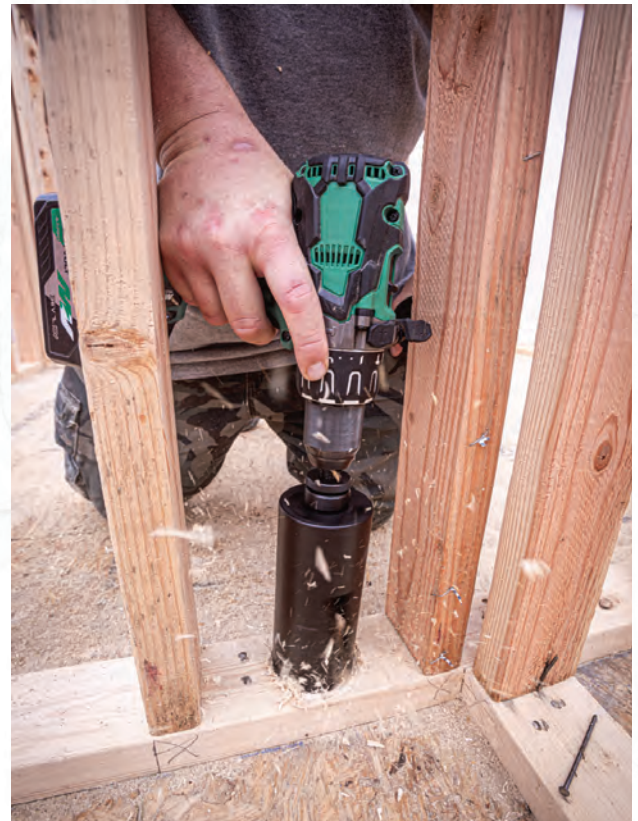

Spyder® Deep Cut Hole Saws are not compatible with our Rapid Core Eject™ system.

† These hole saws are not recommended for harder, abrasive materials including floor tile, porcelains and poured concrete, which may have a Mohs hardness of 6 or greater.

HOLE SAWS

DIAMOND BITE™ UNIVERSAL CUT-OFF WHEELS

Long-Lasting Diamond Abrasive Powers through Almost any Material

- Lasts up to **100x longer** than conventional cut-off wheels.
- Cuts almost any material - steel, stainless steel, cast iron, rebar, masonry, ceramic tile, composites and more.
- Safer, shatter-resistant steel core won't blow apart like conventional bonded abrasive wheels.
- Lowest cost per cut wheel - spend less time and cost replacing wheels, and more time working.
- Uniform wheel diameter provides a consistent cut.
- Reduced dust and debris during use.

DIAMOND EDGE HOLE SAWS

Premium Diamond Abrasive Provides Long Tool Life and Clean Cuts

- Up to **20x more holes** than standard diamond hole saws.
- Up to **10x faster** than standard glass and tile hole saws.
- Premium boron-coated, industrial diamond abrasive self-sharpenes for quick cuts and long life in tough tile / masonry materials.
- High-temperature, nickel braze adheres at temperatures up to 1.5x the braze of standard diamond hole saws, for increased diamond abrasive retention.
- Segmented cutting edge enhances cut material evacuation and increases cutting performance.
- Oversized and staggered pry holes enable easy core ejection.
- Heavy-duty, single-piece construction and vacuum-furnace heat-treated, high-alloy steel provides a reliable cut and consistent, round holes.
- Black oxide finish reduces cutting friction and prevents corrosion.
- Can be used wet or dry - water spray or immersion will increase tool life, reduce dust and debris, and create a more quiet cut.
- 1-1/2" depth of cut.
- Made in the USA.

TARANTULA™ CIRCULAR SAW BLADES

NiCo (Nickel Cobalt) Teeth Provide Clean Cuts and Exceptionally Long Life

- Lasts up to **6x longer** than conventional blades.
- Alternating tooth bevel (ATB), alternating tooth bevel with raker (ATB-R) and ultra tough NiCo (nickel cobalt) cutting teeth are sharpened 3x for exceptionally clean cuts.
- Interfused anti-friction coating protects against heat, gumming and corrosion.
- Polymer stabilization vents reduce noise and vibrations.
- Framing / construction blade is up to 3x stronger for reduced blade binding.

TARANTULA™ DADO CIRCULAR SAW BLADES

Oversized, Ultra Tough NiCo (Nickel Cobalt) Teeth Cut Exceptionally Clean Grooves from 1/4" to 13/16"

- Lasts up to **6x longer** than conventional blades.
- Alternating tooth bevel (ATB) profile on the outer scoring blades and re-sharpenable, oversized ultra tough NiCo (nickel cobalt) cutting teeth are sharpened 3x for exceptionally clean cuts.
- Flat top grind (FTG) chippers cleanly remove material for ultimate cut joints.
- Interfused anti-friction coating protects against heat, gumming and corrosion.
- Cuts grooves from 1/4" to 13/16" in soft and hard woods, plywood and melamine.
- Each set includes 2 blades, 3 chippers, 3 spacers and 8 width alignment shims.

STEEL CUTTING CIRCULAR SAW BLADES

Advanced Ultra Tough NiCo² (Nickel Cobalt) Teeth Specifically Designed for Clean Cuts in Steel & Other Metals

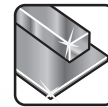

- Up to **35x more** cuts than bonded abrasive cutting wheels.
- Up to **10x faster** than bonded abrasive cutting wheels.
- Modified Triple Chip Grind (MTCG) results in dramatically cooler cutting and burr-free cuts with fewer sparks than those made with a bonded abrasive cutting wheel.
- Interfused anti-friction coating prevents blade binding and protects against heat and corrosion.
- Polymer-filled stabilization vents reduce noise and vibrations for a cleaner, straighter cut.
- Designed for use on metal cutting circular saws that feature high torque and low-RPM motors - not recommended for use on standard wood-cutting circular saws.

STINGER™ MACH-BLUE™ HIGH-SPEED STEEL (HSS) DRILL BITS

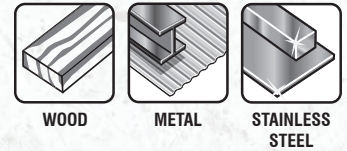

High-Performance Metal & Wood Drilling Bits

- Up to **100x more holes** than titanium or black oxide drill bits.
- Up to **8x faster** than titanium or black oxide drill bits.
- Proprietary Mach-Blue™ Armor Plating is a super hard surface that retains sharper cutting edges, and reduces heat build-up and cutting friction – resulting in faster cuts and exceptionally long drill life.
- Impact-rated 1/4" speed hex won't slip in conventional 3-jaw chucks and ideal for use in quick-change impacting power tools.
- Optimized 137° self-centering split point cutting geometry won't walk or wander – even on pre-hardened or curved surfaces.
- Advanced M-Series alloy tool steel construction and proprietary heat treatment increase drill bit durability, rigidity and breakage resistance.
- Ideal for drilling wood with nails, stainless steel, mild steel, aluminum, stacked materials and other tough-to-drill alloys.
- Made in the USA.
